

# Draught Guard

## Beer Line Treatment System

Proven and validated to extend beer line cleaning from **twice monthly to once per quarter**.

Draught Guard generates and propagates a low-frequency AC signal throughout your beer lines, which inhibits beer matter to settle and/or attach to beer lines.

Fewer cleanings means you're minimizing cleaning chemicals funneling through your lines.

## Success Stories

### Coors Field Denver, CO

Improved line cleanliness by 42% after putting in Draught Guard. 500 lines with 200ft average per line.

### Cowboy Jacks Mall of America

Improved line cleanliness by 83% after only 12 weeks with installing Draught Guard. 20 lines with 100ft average per line.

### Dodger Stadium Los Angeles, CA

Improved line cleanliness by 92%. Beer line cleanings reduced to only twice per season, for a \$30,000+ seasonal savings.

### Buffalo Wild Wings Grand Rapids, MI

Improved line cleanliness by 89% after 12 weeks with Draught Guard. Reduced its cleanings to once per quarter.

### Leinenkugel's Chippewa Falls, WI

Improved line cleanliness by 61% after only eight weeks with Draught Guard. Estimated 28,800oz of beer can be saved annually.

### Applebee's Milwaukee, WI

After line cleanliness improved by 58%, the store extended its cleanings to every 8 weeks for a \$3,000 annual savings.
